- We ensure that our purchasing through authorized suppliers contributes to the safety of the food we serve and the facilities we operate.
- We regularly train our people on their important responsibilities to maintain a safe and healthy workplace and service environment.
- We frequently review and enhance our food, environmental and workplace safety standards, practices and programs.
- We strive to continuously improve our food, environmental and occupational safety performance and promote sustainable practices.
- We ensure active ownership from our people and encourage participation from our clients, customers, partners and other stakeholders to play a role in achieving our safety goals.
- We foster a culture of “Front Line First” where all team members are well supported in their ability to reduce safety risks; prevent incidents, injuries and foodborne illnesses; and protect the environment.
- We ensure that everyone has the right and obligation to stop and question any job that causes concern about their personal safety, the safety of others and the environment.
