

FACILITIES MANAGEMENT SERVICES FOR AIRPORTS

Transform the passenger experience with custodial services and operational excellence rooted in hospitality.

The passenger experience at an airport is, at its heart, a guest experience. Whether touching down in a new city for the first time, departing on a business trip or simply coming home, a comfortable and clean environment makes all the difference. Exceptional custodial services and operations rooted in hospitality elevate the mundane to the extraordinary.

Every detail shapes the passenger experience, from restroom cleanliness to overall terminal appearance. Aramark Facilities Management is the partner of choice for people-centered organizations across the nation. From supporting landmark tourist destinations and major sporting events to serving schools and hospitals, our passion for hospitality runs deep and shapes our approach to exceeding expectations.

The Aramark team is more than just a facilities service provider: We are an extension of your team and your values, committed to your travelers and invested in your success.

A BUSTLING AIRPORT, MADE BETTER

With decades of experience and dozens of awards for excellence, innovation and company culture, we bring technical expertise and leadership to transform facilities management at your airport. The result: more effective and efficient custodial services, improved cleanliness scores and boosted guest satisfaction.

Through integrated facilities management (IFM), Aramark provides a suite of comprehensive solutions to cover all your needs in one place: operations and maintenance, custodial services, engineering, HVAC, electrical, pest control, building intelligence, staffing and more.

WE SUPPORT & SERVE:

National parks, state parks and protected forests

Landmark attractions and other iconic destinations

Convention centers

Sports arenas and stadiums

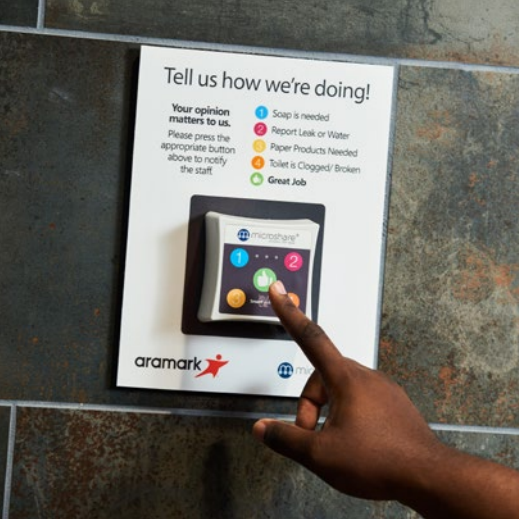

Meeting spaces

Millions of guests each year

- Leading-edge expertise and technology
- Real-time insights and IoT data-driven business intelligence
- Environmentally-friendly, chemical-free cleaning
- In-house team support
- Talent acquisition, training and management
- Cost management and transparency
- Budget optimization
- And much more

SMART SPACES AND DEMAND-DRIVEN CLEANING

Enhance airport cleanliness, especially in high-traffic areas like restrooms, by tapping into the power of IoT networks and sensors with Aramark's AIWX™ Connect.

AIWX™ Connect uses real-time data and feedback to create dynamic, demand-driven cleaning schedules. Smart restrooms, for example, track usage and automatically alert staff when cleaning is needed. This improves cleanliness standards and quality scores, while adding an layer of protection.

AUTONOMOUS CLEANING ROBOTS

Transform airport cleaning with autonomous robots. These robots navigate terminals, maintaining cleaning standards across various floor types. Features like self-charging, water management and automated scheduling allow custodial staff to focus on other priorities, ensuring a safe, clean and welcoming environment.

ENVIRONMENTALLY-RESPONSIBLE CLEANING CHEMICALS

Switch to eco-friendly cleaning with Aramark's advanced technology. Using electrochemically activated solution (ECAS), Aramark's environmentally-responsible program turns tap water into a highly effective cleaner, eliminating traditional chemical use with a low-level electrical charge. This method supports sustainability, reduces carbon footprint and improves safety for passengers and staff alike—all while maintaining quality standards.

Elevate the passenger experience and drive operational excellence

with Aramark Facilities Management.
