

# PREDICTABLE FACILITIES MANAGEMENT FOR FOOD & BEVERAGE MANUFACTURING

**Ensure operational efficiency, regulatory compliance and cost savings with full-service integrated facilities management.**

Safe and well-maintained spaces are non-negotiables for food and beverage manufacturers. From complying with regulations to ensuring worker safety and producing quality products — the stakes are high.

Staying ahead of strict regulations while ensuring peak productivity and profitability requires a comprehensive, strategic approach. Working with the right integrated facilities management partner makes all the difference.

With decades of experience and a proven track record, Aramark Facilities Management is that trusted partner for manufacturers. We maintain safe and compliant working environments with well-trained, satisfied employees and consistently strong audit scores.

## WHAT MAKES ARAMARK UNIQUE?

We support hundreds of organizations every day, many of them with complex needs across multiple sites. We know how to get things done. But we also delight in finding custom, flexible solutions tailored to your business—helping you remain compliant, reduce your costs and improve your audit scores. Our team is an extension of yours, invested in your success and committed to achieving great things together.

## YOUR OPERATIONAL CHALLENGES, SOLVED

**Integrated Facility Management (IFM)** is a comprehensive, progressive approach to managing all your facilities needs with one centralized team of experts. The result: streamlined, efficient services that reduce costs and risks, while improving operations.

Our flexible delivery model provides scalable solutions that serve a single location or multi-site delivery over a distributed geography with:

- **Management oversight**
- **Facility maintenance & strategy**
- **Grounds and landscaping**
- **Janitorial services**
- **Sanitation services**
- **Pest control**
- **Engineering & technical services**
- **Energy solutions**
- **Staffing, recruitment & training**
- **Workplace experience**
- **Production line support services**
- **And more**

This advanced level of support means consistently safer, cleaner and more cost-effective services that lead to broad financial and business impact, while allowing your employees to focus on their core mission.

# OVERCOME COMMON OPERATIONAL CHALLENGES, INCLUDING:

## Regulatory Compliance & Audits

The cost of non-compliance or failed audits is severe, with the possibility of legal ramifications in addition to reputational damage and production shutdowns. *Aramark has never failed an FDA inspection.*

## Insufficient Staffing

Getting the right people for the job can be difficult, especially with persistent skilled labor shortages. Having a skilled workforce is critical to avoid recalls, equipment damage, liability issues and production line shutdowns. Whether on the production lines, in the warehouse, in thrift store operations or for route drivers, we provide a reliable, well-trained and productive workforce.

## Supply Chain Inefficiencies

Having multiple contracts for different services instead of leveraging integrated facilities management and best practices in sanitation can lead to price and supply chain inefficiencies, in addition to inconsistent quality and performance. With our extensive network of vendors — including a \$13 billion group purchasing organization (GPO) — we pass cost savings on to you, while optimizing logistics and standardizing quality across sites.

## Escalating Operational Complexity & Cost

Leveraging technological innovations in facilities management is one of the most effective ways to reduce both costs and risk over the long term as your operations scale. Our commitment to continuous innovation, with a dedicated R&D team and our Center of Excellence, gives you access to leading-edge solutions that directly impact your bottom line.

## SUCCESS STORIES

By the numbers

- A large baking manufacturer **reduced their total cost of ownership by over 10%** while improving services.
- The same baking manufacturer **increased their third-party audit scores by 17.6%** across sites.
- A major beverage manufacturer saw a **22% cost reduction during the first five years**.
- A food packaging company secured **15% cost reduction while increasing reliability** through standardized maintenance practices.

# WE'RE THE STRATEGIC PARTNER

to streamline your facilities management,  
lower your total cost of ownership and  
exceed expectations.
